This Week: How is Idle Time Calculated?                    10/9/2019

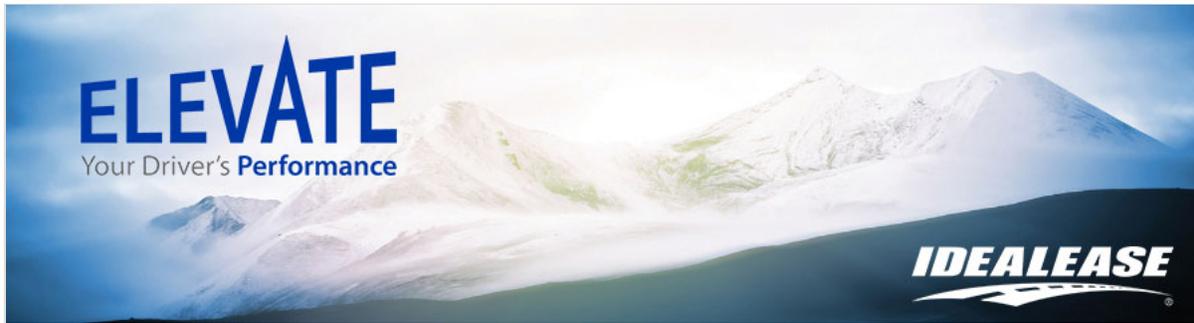

# How is Idle Time Calculated?

**Q:  Can you explain how idle time is calculated?**

**A:  The ECM transmits *engine hours* to the telematics device, which provides *Total Engine Hours*, *Total Idle Hours*, and *Total PTO Hours*.**

**In the scorecard, we calculate the Idle % by dividing *Idle hours* by *Total Engine Hours*.**

**1.65 Engine Idle Hours / 22.3 Total Engine Hours = 7.4% Idle**

**It is important to note that although many of our vehicles do not have a PTO function, it is possible to have *PTO Hours* reported in your scorecard. Those hours will be added to the engine idle hours to produce a <u>true</u> engine Idle %.**

**You will see more on *PTO hours* in a future *Elevate Tip of the Week*.**
